01/2024 - 02/2024:

- Company in the field of "technologies for industry, infrastructure and mobility", +1,400 employees.
- Consulting as well as preparation and implementation of training in the context of the Microsoft Power Platform.

11/2023 - 11/2023:

- Company in the field of "production of lubricants", +5,000 employees, international sales.
- Consulting as well as preparation and implementation of training in the context of the Microsoft Power Platform.

06/2023 - 06/2023:

- Company in the field of "sun protection", +5,000 employees, international sales.
- Consulting, education, and training as well as technical support and implementation of applications in the context of Microsoft SharePoint, Microsoft Power Platform, Microsoft Power Automate and Microsoft Power Apps.

06/2023 - 06/2023:

• Company in the field of "consulting and software development service providers in the Microsoft 365 area", +10 employees.

Advice as well as preparation and implementation of training courses in the
context of the Microsoft Power Platform, in particular on Microsoft
SharePoint Online, Microsoft Power Platform Adaptation Framework,
Microsoft Dataverse, Microsoft Power Automate, Microsoft Power
Apps, Microsoft Power Platform licensing, Microsoft Power Platform
training and education resources including Microsoft Power Platform
certification.

06/2023 - 06/2023:

- Company in the field of "services for all topics of information technology", +50 employees.
- Preparation and implementation of webinars/seminars in the context of the Microsoft Power Platform

04/2023 - TODAY:

• Development of a **Microsoft Power Platform custom component library** (https://www.powermosaix.com) with 150+ UI/UX elements.

04/2023 - 05/2023:

- Company in the field of "Engineering and IT service providers", +8,500 employees.
- Advice on and implementation of projects in the context of the Microsoft Power Platform.

12/2022 - 12/2022:

- Company in the field of "production and development of gears and drive elements", +70 employees.
- Consulting, education, and training in the area of **Microsoft 365**, in particular **Microsoft Power Platform** and **Microsoft Power Automate**.

12/2022:

- Company in the field of "environmental services for the private and commercial sector".
- Consulting, education, training as well as technical support and technical implementation in the context of Microsoft SharePoint, Microsoft Power Platform, Microsoft Power Automate and Microsoft Power Apps.

• Economical, technical digitization and automation of analogue business processes.

12/2022 - 12/2022:

- Company in the field of "electrical engineering, electronics and automation",
 +20,000 employees, international sales.
- Consulting, education, training, and technical support in the context of Microsoft SharePoint, Microsoft Power Platform, Microsoft Power Automate and Microsoft Power Apps.

12/2022 - 08/2024:

- Company in the field of "social work and care", +2,000 employees, international recognition and presence.
- Consulting, conception and independent technical implementation of analogue business/approval processes based on Microsoft Word, Microsoft SharePoint, Microsoft Power Automate and Microsoft Power Apps.
- Digitization and automation of the analogue business trip application and the analogue travel expense report based on Microsoft SharePoint, Microsoft Power Apps and Microsoft Power Automate.
- Employee education/training in the area of Microsoft 365, in particular
 Microsoft SharePoint and Microsoft Lists.

12/2022 - 12/2022:

- Company in the field of "information technology and digitalization", head office in Cologne.
- Consulting, education, training and independent technical implementation of digitalization and automation projects based on Microsoft 365, Microsoft Office 365 and Microsoft Power Platform.

04/2022 - TODAY:

- Company from the "automotive" sector, +3,000 employees, international sales at +20 locations.
- Consulting in the area of **Microsoft 365**, in particular **Microsoft SharePoint/Lists**, **Microsoft Planner** and **Microsoft Power Platform**.
- Process modernization, process digitization and automation of various analogue/paper-based processes such as internal requirements management system or employee training management system based on Microsoft

SharePoint/Lists, Microsoft Planner and Microsoft Power Automate (approval workflows) and Microsoft Power Apps (user interface).

- Process digitization and automation of a hybrid HR database (consisting of an on-premises HR system and Azure Active Directory employee data) based on Microsoft SharePoint/Lists and Microsoft Power Automate.

04/2022 - 04/2023:

- Company in the field of "energy supplier", +7,500 employees at +40 locations, international sales.
- Advice, conception and creation of a training concept (in German and English)
 for the introduction of digital signature processes based on Adobe Acrobat
 Sign.
- Advice, conception and creation of training documents (in German and English) based on **Microsoft Power Point** and **Adobe PDF**.
- Consulting, conception and creation of training videos (in German and English) based on **TechSmith Camtasia**.
- Training of employees (in German and English) to introduce digital signature processes in the company (simple electronic signature (EES), advanced electronic signature (FES), qualified electronic signature (QES)) based on Adobe Acrobat Sign, Intesi Group S.p.A. and D-Trust GmbH (Bundesdruckerei Gruppe GmbH) via Microsoft Teams.
- Creation and implementation of training surveys (in German and English)
 based on Microsoft Customer Voice to evaluate and evaluate the quality of
 the training.
- Conducting a digital employee consultation hour for questions and answers on training topics via **Microsoft Teams**.

04/2022 - 04/2022:

- Company in the field of "manufacturers of synthetic resin systems", +500 employees, locations in +30 countries.
- Advice, education, training and technical support for the migration of analogue process workflows such as IT user applications, IT software applications, IT hardware applications, material delivery, catering and company restaurant reservations, etc. towards the Microsoft Power Platform based on Microsoft Power Automate.

02/2022 - TODAY:

- Company in the field of "sales of heaters", +50 employees, 4 locations in Germany.
- Introduction of Microsoft SharePoint as a collaborative data store and Microsoft Lists as a (initially cost-neutral) central user interface for administration.
- Introduction of Microsoft Power Automate as the central automation platform.
- Creation of a data migration strategy from customer CRM, Excel and Google spreadsheets (customer, employee and order data) to Microsoft SharePoint

 against the background of future possible/necessary scaling towards
 Microsoft Dataverse and Microsoft Power Apps.
- Process digitization and order status-based automation of central order data processing with Microsoft Power Automate (Cloud Flow).
- Process modernization and digitalization of order processing with Microsoft
 Teams, Microsoft Outlook and Microsoft Planner.
- Automate customer data processing between customer CRM and Microsoft Power Platform using Microsoft Power Automate (Cloud Flow) and SOAP API.
- Automation of invoice processing with Microsoft Power Automate (Cloud Flow) and sevDesk REST API.
- Automation of the creation of quotes and order confirmations using Microsoft
 Power Automate and Adobe Acrobat Sign.
- Design and implementation of lead and customer management, as well as order data processing, based on the Microsoft Power Platform and Microsoft Power Apps (Canvas App).
- Conception and implementation of order data processing based on the Microsoft Power Platform and Microsoft Power Apps (Canvas App).
- Employee education/training in the area of Microsoft 365, in particular Microsoft SharePoint and Microsoft Lists.

01/2022 - 12/2023:

• Company in the field of "IT service provider digital transformation", +2,200 employees at +5 locations in Germany.

Customer consulting, education and training in the area of Microsoft 365,
 Microsoft Office 365 and Microsoft Power Platform.

01/2022 - 12/2023:

- Company in the field of "international airport operations", +2,000 employees at +100 locations in +30 countries.
- Education, training, workshops and consultation hours (German/English) in the area of Microsoft 365, Microsoft SharePoint (libraries and lists) and Microsoft Power Platform (in particular Power Apps and Power Automate Cloud Flows).

08/2021 - 10/2022:

- Company in the field of "manufacturers of bathroom fittings", +50 employees in international sales.
- Introduction and development of a Data Warehouse (DWH) based on Microsoft technologies, in particular migration of a Synology and Microsoft Excel database to Microsoft OneDrive for Business and Microsoft SharePoint, Microsoft Dynamics 365, Microsoft Dataverse / Common Data Service (CDS).
- Introduction of Microsoft OneDrive for Business and Microsoft SharePoint
 as central file and document storage, especially for business data, business
 logic and documentation.
- Introduction of and education/training in **Microsoft Power Automate** (Cloud Flow and Desktop Flow) as a central automation platform.
- Automation and optimization of business processes in the form of Cloud-RPA (unattended) with Microsoft SharePoint, Microsoft Planner and Microsoft Power Automate, in particular for managing and synchronizing business data/files with the website (automated data transfer SharePoint > FTP).
- Automation and optimization of marketing-relevant business processes in the form of Desktop RPA (attended) with Microsoft Power Automate Desktop and Microsoft Power BI, in particular for the collection, visualization and evaluation of online insights from social media and search engines.
- Creation of an **Online-Audit** to identify optimization potential with a view to increasing reputation in online media (SEO and social media) as well as advice and support for the technical/content implementation.
- Consulting and conception of the website migration from "native PHP" to Microsoft Dynamics 365 Commerce and Microsoft Dynamics 365 Marketing.

- Consulting and conception of the implementation of Google Analytics and Microsoft Clarity via Google Tag Manager for data visualization and data analysis with Microsoft Power BI.
- Beratung und Unterstützung bei der Realisierung eines DSGVO-konformen
 Online-Datenschutzniveaus.
- Consulting and support in realizing a **GDPR-compliant level of online data** protection.
- Employee education/training in the area of the Microsoft Power Platform, in particular Microsoft Dataverse / Common Data Service (CDS) and model-driven apps.

01/2019 - 03/2022:

- Company in the field of "ultra-fresh food distribution", +4,5000 employees at +2,500 locations in 7 countries.
- Introduction and development of a Data Warehouse (DWH) based on Microsoft technologies, in particular migration of a Microsoft Excel database to Microsoft Dynamics 365 and Microsoft Dataverse / Common Data Service (CDS).
- Introduction and RPA-supported maintenance of Microsoft Outlook calendars as accompanying and supporting software for location and location data management.
- Introduction of Microsoft OneDrive for Business and Microsoft SharePoint
 as central file and document storage, especially for business data, business
 logic and documentation.
- Introduction of Microsoft Customer Voice as a central platform for collecting (Microsoft Forms), processing (Microsoft Power Automate) and evaluating (Microsoft Power BI) customer feedback.
- Introduction of **Microsoft Power Apps** (model-driven and canvas apps) as a central data processing platform.
- Creation of various model-driven **Microsoft Power Apps** for site management.
- Creation of a Microsoft Power Apps Canvas App for QM/QS-management at locations.
- Introduction of **Microsoft Power Automate** (Cloud Flow and Desktop Flow) as the central automation platform.
- Partially automated synchronization of data from +1,000 locations as custom maps in **Google Maps**.
- Partially automated synchronization of location data against +1,000 local business directory entries in **Google My Business**, **Bing Places for Business** and **Facebook Locations**.

- Automation and optimization of business processes relevant to sales in the form
 of Cloud-RPA (unattended) with Microsoft Power Automate (+200 flows) as
 well as Microsoft Web-API and Microsoft Graph-API, in particular for
 handling multilingual online ordering processes (interfaces/ API initiated via
 company website).
- Introduction and implementation of a delivery service based on the Microsoft
 Power Platform, in particular the components Microsoft Dataverse / Common
 Data Service (CDS), Microsoft Power Apps, Microsoft Power Automate
 (e.g. for automated invoicing and ERP-support).
- Accompaniment and support of agencies via GitLab in the implementation of the automated online ordering process and the delivery service based on the Microsoft Web API.
- Automation and optimization of marketing-based business processes in the form of Desktop-RPA (attended) with Microsoft Power Automate Desktop, in particular for the publication and evaluation of social media posts at +1,000 Google My Business locations.
- Creation of an online audit to identify optimization potential with a view to increasing the reputation in online media (website technical/content, SEO and social media) as well as advice and support with implementation.
- Organization and implementation of workshops on marketing-related topics.
- Advice and support in realizing a GDPR-compliant level of online data protection.
- Advice and support with/the website migration from TYPO3 to WordPress (with international instances).
- Advice, support and employee training in the field of social media management (Facebook/Instagram, business manager, advertising manager, advertising campaigns).
- Employee education/training in the area of the **Microsoft Power Platform**, in particular **Microsoft Dataverse** / Common Data Service (CDS) and model-driven apps.

01/2022 - 02/2022:

- Company in the field of "chemical industry", +1,000 employees at +100 locations in +20 countries.
- Advice and support in creating a migration strategy for data and applications from Lotus Notes towards Microsoft 365, Microsoft SharePoint and Microsoft Power Platform.
- Education and training in the area of **Microsoft 365**, **Microsoft SharePoint** and **Microsoft Power Platform** (licenses, Dataverse for teams, Power Apps

for teams, Power Automate for teams, Dataverse, Power Apps, Power Automate, Power Virtual Agents, Portals).

01/2022 - 02/2022:

- Company from the "packaging industry" sector, +20 employees at one location in Germany.
- Consulting and technical support in the area of Microsoft 365, Microsoft
 SharePoint and Microsoft Power Platform especially Power Apps.

11/2021 - 12/2021:

- Company from the "sun protection" sector, +300 employees at one location in Germany, international sales.
- Introduction of **Microsoft Power Automate** (Cloud Flow and Desktop Flow) as the central automation platform.
- Automation and optimization of business processes (invoice processing) in the form of Cloud-RPA (unattended) with Microsoft Power Automate (Cloud Flow and Desktop Flow), Microsoft AI Builder and Microsoft Dynamics 365 Business Central (Dynamics NAV - Navision).
- Creation of a solution based on Microsoft SharePoint (asynchronous) that displays the Microsoft Teams activity/availability status of all employees from the Azure Active Directory in a "real-time" list, using a Microsoft Azure enterprise application, Microsoft Power Automate (Delegated and webhook) as well as the Microsoft Graph API (Active Directory and User Presence Status subscription).
- Creation of a Microsoft Power BI dashboard (real-time), which collects the
 Microsoft Teams activity/availability status of all employees from the Azure
 Active Directory in a streaming dataset, using a Microsoft Azure enterprise
 application, Microsoft Power Automate (Delegated and Webhook),
 Microsoft Graph API (Active Directory and User Presence Status
 Subscription) and the Microsoft Power BI API.
- Creation of a solution based on Microsoft SharePoint (asynchronous),
 Microsoft Power Automate, Microsoft Graph API and the Philips hue
 API, which uses the Philips hue Bridge to send the Microsoft Teams activity/availability status of a user from the Microsoft Azure Directory to a Philips light that can display the status in color.
- Employee education/training in the area of the Microsoft Power Platform, in particular Microsoft Dataverse / Common Data Service (CDS) and Power Apps.

01/2021 - 04/2021:

- Company in the field of "finance", +20 employees in Germany.
- Consulting, design and technical implementation of financial product landing pages based on WordPress with connection of form data to the Microsoft Power Platform including automated processing using Microsoft Power Automate.
- Advice, conception and technical implementation/automation of pre-contract, contract and signature processes using Microsoft Power Automate and Adobe Acrobat Sign.

04/2019 - 04/2019:

- "Compression products manufacturer" company, +200 employees, worldwide sales.
- Training in Switzerland and Germany, including the following topics:
 - Microsoft 365 (general, update service, patch Tuesday, roadmap and feature rollouts).
 - Microsoft Windows 10 (Facts, Keyboard Shortcuts, Activity Monitor, Timeline, Notification Assist, Environment Sharing, Projecting, Mobility Center, Ink Workspace, Tips & Tricks, Hands-on Labs).
 - Microsoft Office 365 (adaptation to personal preferences, intelligent services, add-ins, elicit creativity, work unleashed, work naturally with pen, touch and voice, create content with intelligent services, in-app search for information, visualize on new way, teamwork across any platform/device, improving work habits).
 - Microsoft Word (Take the Tour, Title Bar, Smart Services, Smart Search, Dictation, Read Aloud, Translator, Thesaurus, Acronyms, @Mentions, Tips and Tricks, Practice)
 - Microsoft Excel (Take a Tour, Title Bar, Smart Office Services, Smart Search, Time Saving Features, Flash Preview, Chart Types (Map and Funnel Chart), Share Documents with Permission, Tips and Tricks, Hands-on Exercises).
 - Microsoft PowerPoint (take a tour, title bar, intelligent office services, zoom, designer, morph, photos and images (also crop), graphics, pictograms, 3D models, laser pointers, tips and tricks, practical exercises).
 - Microsoft OneNote (navigation and search, notebook, page, subpage, sections, section and page outline, page templates, categorization, internal linking, insert media, draw, revise with highlighter or pen, send to OneNote, tips and tricks, hands-on exercises).

- Microsoft Teams (Team, Channel, Tab, Command Panel, Status Bar, Notifications, Delegates, Communicate through Chat, Meetings, Calls, Chat with T-Bot, Meet Instantly, @Mentions, Tips and Tricks, Hands-on Labs).
- Microsoft Outlook E-Mail (e-mail views, focused inbox, notification settings, conditional formatting, @mentions, quick steps, quick parts, delayed sending, recalling sent e-mails, search folders, editing the subject line of an e-mail later, saving an e-mail -Mail in OneNote, tips and tricks, practical exercises).
- Microsoft Outlook Calendar (calendar views, overlay calendars, share calendars, plan meetings, plan meetings with time zones, FindTime for making appointments with external participants, practical exercises, tips and tricks, practical exercises).
- Microsoft Outlook Tasks (task view, create task from e-mail, assign task to another person, tips and tricks, practical exercises).
- Microsoft To-Do (Design/Customization, To-Do Lists, My Day, Important, Scheduled, Flagged Email, Search, Tips and Tricks, Handson Exercises).
- Microsoft Planner (Planner Hub, bucket usage, task, my tasks, charts, schedule, members, filters, grouping, add plan to Outlook, integration with teams, tips and tricks, hands-on exercises).
- Microsoft OneDrive for Business (OneDrive for Business versus SharePoint, storing and sharing files, synchronizing with local computer, file recovery, integration into teams, hands-on exercises).
- Microsoft SharePoint (SharePoint versus OneDrive for Business, conversations, libraries, search and find, following and notifications, site workflows, integration with teams).
